PROFESSIONAL SUMMARY

Results-driven cybersecurity graduate with an M.Sc. in Information Security & Digital Forensics and a proven competitive track record, including 4th place in the international-level CTF hosted by Karunya Institute of Technology and Science and a Top 50 finish at DEFCON CTF. Skilled in penetration testing, network vulnerability assessment, web application security, and malware analysis, with hands-on offensive security experience across Hack The Box, TryHackMe, and PicoCTF. Holds industry-recognized certifications in Red Team Operations Management and Social Engineering Defense.

TECHNICAL SKILLS

Offensive Security: Penetration Testing, Network Scanning & Enumeration, Web App Security (OWASP), Privilege Escalation, Social Engineering

Defensive & Forensics: SIEM Management, Log Analysis, Malware Analysis, Vulnerability Assessment, Digital Forensics, Incident Response

Tools & Platforms: Nmap, Metasploit, Burp Suite, Wireshark, Gobuster, Linux CLI, Kali Linux, ISO 27001

Programming: Python, Bash

ACHIEVEMENTS & LEADERSHIP

- Won 4th place in the international-level CTF conducted by Karunya Institute of Technology and Science.
- Ranked Top 50 in DEFCON CTF, one of the world's most competitive information security competitions.
- Competed in national-level CTF challenges on PicoCTF, Hack The Box, and TryHackMe, covering cryptography, binary exploitation, digital forensics, and web security categories.
- Event Organizer: Organized and conducted CYBERGEN 2026, a cybersecurity hackathon, coordinating event activities and participants.
- Student Coordinator: Serving as a Student Coordinator for the Cybersecurity Club, supporting technical events, workshops and student activities.

PROJECTS

Hybrid CNN-LSTM Model for Network Attack Attribution & Forensic Reconstruction **2024 – 2025**

Academic Research Project

- Developed a CNN-LSTM model to classify and attribute network-based cyberattacks.
- Preprocessed network traffic data and evaluated performance using precision, recall and F1-score.
- Generated forensic reports to support post-incident investigation and analysis.

CyberTwin AI – AI-Powered Digital Twin for Cyber Attack Simulation **2026**

Python | FastAPI | React | TypeScript | NetworkX | MITRE ATT&CK

- Developed a digital twin to simulate cyberattacks and visualize enterprise network infrastructure.
- Implemented attack path analysis, risk scoring, blast radius assessment and AI-assisted security recommendations.

CERTIFICATIONS

- Certified Red Team Operations Management – Red Team Leaders
- Certified Social Engineering Defense Practitioner – SecOps Group
- Google Cybersecurity Certificate
- Ethical Hacking – NPTEL
- Database Management Systems – NPTEL
- Networking Essentials – Cisco
- Python Essentials – Cisco

EDUCATION

M.Sc., Information Security & Digital Forensics **2025 – 2027**

Karunya Institute of Technology and Science | CGPA: 8.9 / 10

B.Sc., Computer Science with Cyber Security **2022 – 2025**

Rathinam College of Arts and Science | CGPA: 7.5 / 10

HSC **2020-2022**

SSVMS | 7.5/10

SSLC **2020**

SSVMS | 8.8/10
